## CLEAR AWAY AGING SKIN

ClearLift tip represents the latest alternative to skin resurfacing and cosmetic surgery.

## IT'S LIKE LASER SURGERY

ClearLift takes years off of your face in just minutes, providing similar results to chemical peeling and laser resurfacing.

Treatment is virtually painless and has absolutely no downtime, making it the first laser treatment for sensitive areas of the body including hands, neck, decollete and around the eyes.

## ADVANCED LASER TECHNOLOGY

**ClearLift represents a breakthrough in cosmetic laser technology**

## MICROSCOPIC HOLES UNDER THE SKIN

ClearLift emits short, yet extremely powerful bursts of light which reach underneath the skin's surface; stimulating the collagen and breaking apart unwanted pigmentation.

## BYPASSING THE OUTER LAYER

The unique characteristic of ClearLift is the fractional pattern which doesn't ablate the skin.

By avoiding damage to the skin's outer layer, treatment becomes virtually painless, results are quicker and there's absolutely no downtime.

*Ask your practitioner how ClearLift can help you.*
